(54) Title: PIPELINE SYNCHRONISATION DEVICE

(57) Abstract: Pipeline synchronisation device for transferring data between clocked devices having different clock frequencies. The Pipeline synchronisation device comprises a mousetrap buffer for exchanging data with one of said external devices said mousetrap buffer having a signalling output for coordinating the data exchange with the external device. The pipeline synchronisation device comprises further a synchroniser adapted to synchronising the change in a signalling output with the clock of the external device.
